Thanks Alanna. I was hoping to play this video on "mute" while I'm talking...

- **Wyckoff Superfund Site Diver Cap Sampling**

[Video: Performance Assessment of the Wyckoff Superfund Site Cleanup Cap \(1:24 Minutes, 54.2MB, Windows Media Format\)](#)

Videos on the willamette are harder to use for obvious reasons...

Kristine/Sean,

Thanks for prompt response. Is there a video link for slide 11? A courtesy PDF copy of this presentation will be sent to Barbara by COB today.

Unless I hear otherwise, I'll continue working with contractor to draft the remaining CAG technology presentations. The CAG requests copies of PPTs to post to their website. The slides alone are not very useful. I'm working on narrated, general overview versions of the technology presentations for CAG and EPA website – will discuss later.

Alanna

Here are my changes to the presentation. Can you share with Barbara on Monday?

Thanks,

Kristine Koch

Hi Kristine,
general overview of in-situ cap technology for the CAG meeting next Wed. Please send comments by COB tomorrow, at latest 2pm Wednesday, March 4th. I will be out Thrus and Friday.

Portland Harbor specific discussion on caps should be added after the map. You can add, or if you send the figures, I can include. DEQ plans to present on McCormack and Baxter cap.

The SKEO contractor that I worked with has expertise in sediment treatment technologies. We will put together the other technology presentations in similar format. You will only have to add the PH specific discussion.

Thanks
